MESSAGE FROM THE PRESIDENT

Kagoshima University has a long history and rich tradition in education. The university's origins can be traced back to the Hangaku Zoshikan School, which was established in 1773 and was run by the feudal domain. After the merger of several higher education institutions, including the Seventh Higher School established during the Meiji period (1868-1912), Kagoshima University inherited this educational tradition and was newly established in 1949 as a national university. Since then, Kagoshima University has been committed to comprehensively empower its students to positively contribute towards the future of our community and global society.

Kagoshima has a storied history of leaders who promoted the transformation and modernization of this country. In the spirit of these forefathers, this university is embodied by the core values of societal development, academic diversity, and the essence of self-sufficiency & enterprise. Through our educational programs, we aim to instill these same values within our students, and guide them in their growth as productive members of our local and global community. In addition to the advanced skills and knowledge necessary for success in contemporary society, students will gain compassion and understanding for those around them in their daily life.

Over the years, Kagoshima University has developed into one of the leading comprehensive universities in Japan, comprised of nine faculties, ten graduate schools and eighteen education and research institutes, with approximately 9000 undergraduates and 2000 graduate students, 300 of which international students. In our continued pursuit of individual spirit of enterprise, this university has developed and supported a number of programs such as financial support for overseas educational programs, volunteer opportunities, projects addressing social challenges, a scholarship system and student awards program.

Here at Kagoshima University, we also strive to engage in diverse and cutting-edge research. We encourage academic research pursuits in infection control, biological diversity, experimental animal models, the Milky Way Galaxy, and intractable cancer in order to promote our goals for innovation and solutions for community challenges. Additionally, we have pursued many interdisciplinary research opportunities, so that we may provide solutions to local issues regarding the islands, environment, food & health, water, and energy. As “the center of intelligence” in the community, Kagoshima University also promotes the development of quality lifelong learning, cultivation of human resources, joint research projects with the local community, and industry-university-government collaboration.

Our university is located in vibrant Kagoshima, considered as a significant gateway into the rest of Japan. We are surrounded by a diverse selection of natural environments, including volcanic mountains, blue seas, and beautiful islands (such as Yakushima, which has been identified as a world heritage site). As for the campus itself, it is situated in the center of the city, and provides on-campus facilities such as libraries, museums, botanical gardens, and research farms for public use.

I want to personally welcome you to Kagoshima University, and invite you to explore the diverse and unique educational experience we have to offer.

Yoshizane MAEDA
President

President

Facts and Figures

● Undergraduate Faculties 9

● Graduate Schools 10

● Education and Research Institutes 18

● Total Student Body 10,498

● Undergraduates 8,953

University Calendar

Academic Year

4/1 - 3/31 (April 1 - March 31)

Excluding Saturdays, Sundays and National Holidays

First Semester

4/1 - 9/30

(April 1 - September 30)

Spring Vacation

4/1 - 4/10

(April 1 - April 10)

Summer Vacation

8/1 - 9/30

(August 1 - September 30)

Second Semester

10/1 - 3/31

(October 1 - March 31)

Anniversary of University Establishment

11/15

(November 15)

Winter Vacation

12/25 - 1/8

(December 25 - January 8)

● Master 973

● Doctoral 572

● Foreign Students 282

● Faculty Staff 1,037

● Administrative and Technical Staff 1,604

ORGANIZATION

Kagoshima University Fundamental Values

Kagoshima University seeks to produce graduates who boldly take on difficult challenges. Notable leaders throughout Kagoshima's history have promoted transformation and modernization in Japan, and this university shares this historical spirit of initiative that has aided the development of society. At each community level, Kagoshima University seeks to act as a comprehensive center of intelligence that can contribute towards a brighter future for all. In order to achieve this purpose, this university focuses on the following fundamental values.

Spirit of Enterprise

Kagoshima University aims to empower its graduates with a well-rounded education, together with a strong ethical background. Students will gain the ability and willingness to learn independently and operate with the spirit of enterprise. The programs and courses provided at this university serve as a foundational system for students to utilize this spirit of enterprise in their future endeavors.

Innovative Research

Kagoshima University has put significant effort into developing innovative and cutting-edge research. This research is used to fuel solutions to core universal issues that are important to the university in the fields of islands, the environment, food & health, water, and energy.

Community Improvement

As a center for intellectual and cultural lifelong learning, Kagoshima University is deeply committed to collaboration and development with the regional community. Each of the university's faculties is able to utilize their individual strengths to positively contribute to the overall welfare of local society.

World-Class Talent Development

Kagoshima University aims to develop world-class talent in order to contribute to the resolution of international challenges. As part of its emerging role as a center of international exchange, this university has partnered with numerous universities and research institutions across the Asia-Pacific region.

Openness and Transparency

Kagoshima University acts with openness and transparency in order to promote fairness and provide sufficient information to the rest of society. The services and facilities provided here will continue to be improved and open for public use.

STRATEGIC STUDY FIELDS

The research policy of Kagoshima University promotes collaboration and expansion in order to meet regional demands. To the south of Kagoshima lies the 600km stretch of the Nansei Islands, which include such locations as Yakushima (a UNESCO World Heritage Site) and the biologically diverse Amami Islands. Additionally, the prefecture itself is blessed with a rich natural environment that includes active volcanoes, such as Mt. Sakurajima and the Kirishima Mountains. The university develops cutting-edge research in order to utilize these regional features and solve challenges in integral universal fields. Cross-sectional and interdisciplinary research projects have been conducted in the following fields: Islands, Environment, Food & Health, Water, Energy, and Volcano & Earthquake disaster prevention research.

Additionally, the university is involved in International-standard advanced research for infection control, biological diversity, experimental animal models, the Milky Way Galaxy, and intractable cancer. In particular, the university aims to be the Joint Usage / Research Center in the field of advanced research for infection control, in order to increase the number of joint research engagements with overseas institutions.

COURSES OFFERED BY KAGOSHIMA UNIVERSITY

Faculty	Department, Sub-Divisions and Courses	Degree	Starting Term	Course Duration (year)

UNDERGRADUATE FACULTIES

Faculty of Law, Economics and Humanities

<http://www.leh.kagoshima-u.ac.jp/>

The multi-disciplined Faculty of Law, Economics and Humanities aims to produce graduates capable of dealing with society's problems using an in-depth knowledge of social and cultural issues. The Department of Law and Policy has a modern education system to foster versatile legal thinking and planning skills. The Department of Economics, with its low student-to-teacher ratio and emphasis on information literacy, uses three curriculum models to promote problem-solving among its students. Finally, the Department of Humanities offers a range of courses on mental healthcare and the interaction between people and society, multicultural societies and media culture, regional studies and cultural development, and international exchange amongst others. The faculty also offers interdepartmental courses in career education and media studies.

Faculty of Science

<http://www.sci.kagoshima-u.ac.jp/en/index.html>

The history of the Faculty of Science goes back almost 100 years. The Seventh Higher School, Zōshikan founded in 1901 is a forerunner of the faculty. The present faculty was established in 1965 and plays important roles in both education and research in the field of fundamental natural science, as the only such faculty in southern Kyushu. The faculty is composed of four departments, Mathematics and Computer Science, Physics and Astronomy, Chemistry and Bioscience, and Earth and Environmental Science. The educational aim of the faculty is to cultivate scientific interest and give more specialized knowledge in each field. This faculty has produced more than 4,500 graduates until now, and they continue to contribute to various scientific fields.

Faculty of Dentistry

<http://www.hal.kagoshima-u.ac.jp/>

The Faculty of Dentistry was founded in 1977 with the purpose of being the leading regional center for dental education, research and treatment in southern Kyushu. The curriculum is focused primarily on the causes, prevention, and cures of caries, periodontal disease, occlusal anomalies, tooth loss, external injury-aplasia-pain and tumors in the oral and maxillofacial areas. The school aims to train highly talented students who can contribute locally and internationally in all fields of dental medicine. In addition to their dental education, students are encouraged to investigate general medical subjects such as internal medicine and surgery, as well as general academic subjects. Through the unique elective program, students may join research projects in each laboratory in order to develop original ideas.

Faculty of Education

<http://www.edu.kagoshima-u.ac.jp/>

The Faculty of Education originated from a teacher training school founded in 1875. The present institution dates back to 1949 and was expanded in 1994 to include a graduate school. The curriculum stresses individual research and encourages the deepening of specialist knowledge through lectures, seminars, experiments, practical training, field work, the observation of child development, performance, and the practical training of physical education, arts and music. The faculty facilities are high quality, including such sports facilities as an athletics track, a multipurpose playing field, tennis courts, two gymnasiums, martial arts rooms, and a swimming pool. The faculty members are eager to educate and train the excellent teachers of the future.

Faculty of Medicine

<http://www.kufm.kagoshima-u.ac.jp/>

The Faculty of Medicine originated with a British-style medical school founded in 1869. Dr. William Willis, the first principal of that school, introduced western medicine to Kagoshima and trained many Japanese students. Today, the faculty is comprised of two schools, namely, the School of Medicine and the School of Health Sciences. The latter was established in 1998 with the aim of training medical technicians of the highest standard. The faculty cultivates highly qualified professionals and has made substantial contributions to the advancement of medical science and to the health and welfare of people across Japan. It aims to foster personnel who are highly studious, possess well-rounded character, contribute to the local community, and hold an international perspective on medicine and healthcare.

Faculty of Engineering

<http://www.eng.kagoshima-u.ac.jp/>

The Faculty of Engineering provides substantive knowledge and professional skills to each student deeply interested in engineering, manufacturing, or technological development. Students will acquire the ability to solve many problems in today's global society, using their knowledge and skills practically. The faculty has been promoting educational reform to meet international standards and has been cultivating talent among its students, so that they may play active roles in the betterment of the world.

The Faculty of Engineering is composed of seven departments that cover the main fields of manufacturing. The Faculty is committed to training professional engineers, leading in social reform, creating intellectual infrastructure, and developing innovative manufacturing.

Faculty of Fisheries

<http://www.fish.kagoshima-u.ac.jp/>

The Faculty of Fisheries is composed of five fields: Aquatic Sciences, Fisheries Resource Sciences, Marine Food Sciences, Fisheries Economics, and Aquatic Environment Conservation Sciences. The faculty has contributed considerably through its graduate production and applied research in issues ranging from the aquatic environment and resources to their industrial utilization and consumption. This faculty has always been focused on field-oriented education and research. Its education and research agenda center on sustainable development and rational utilization of fishery resources, conservation of aquatic environment and international contribution and engagement in local fisheries. Moving forward, the faculty hopes to maintain its status as a world-renowned fisheries education and research institution, encompassing the tropical and sub-tropical aquatic belt across the globe.

Faculty of Agriculture

<http://www.agri.kagoshima-u.ac.jp/>

The Faculty of Agriculture dates back over 100 years to 1908. Today, the faculty consists of three departments and a new special course : Agricultural Sciences and Natural Resources, Food Science and Biotechnology, Environmental Sciences and Technology, and a special agricultural sub-course in International Food Resources Sciences. In addition, there are three research institutes on and outside the university campus : the Experimental Farms, the University Forests, and the Education and Research Center of Fermentation Studies. The undergraduate course provides students with a wide ranging basic education in agriculture, including field training, laboratory experiments and various research activities. For those seeking the Master of Agriculture degree, a two-year graduate course is available.

Joint Faculty of Veterinary Medicine

<http://www.vet.kagoshima-u.ac.jp/>

The Department of Veterinary Medicine was founded in the Kagoshima School of Agriculture and Forestry in 1939 and became the Joint Faculty of Veterinary Medicine in 2012 as the 9th faculty of Kagoshima University. The Faculty offers inter-university curricula with Yamaguchi University that trains experts with deep humanity to follow a moral code of conduct and to contribute to global society. The Veterinary Teaching Hospital and the Equine Medical Center contribute to the local community as the main animal treatment facilities for both companion and farm animals in the region. The Transboundary Animal Disease Research Center conducts research on infectious diseases such as bird flu, which can easily spread from region to region, or country to country.

GRADUATE SCHOOLS

Graduate School of Humanities and Social Sciences

<http://www.leh.kagoshima-u.ac.jp/>

The Graduate School of Humanities and Social Sciences offers four master's degree courses in Law, Economics and Social Systems, Humanistic-Environmental Cultural Sciences and International Cultural Studies and a doctoral degree course in Social Sciences.

The school promotes a variety of research areas and has developed high quality postgraduate programs centered mainly on community-based subjects, which enhance students' practical expertise in their specialized fields. In order to meet the challenges of providing higher education that is accessible to mature students from the local community, classes are also offered in the evening (to enable those with full-time jobs to enroll) and off-campus in the access centers in Amami and Tokunoshima.

Graduate School of Health Sciences

<http://www.nop.kagoshima-u.ac.jp/>

The Graduate School of Health Sciences aims to develop professionals with highly advanced knowledge and skills in health sciences, and leading administrators who can carry out excellent educational and research activities. Additionally the school trains personnel who can both contribute to health care on remote islands and globally, and disseminate the results and data of educational research widely. In April 2003, a master's course was established, and in April 2005, a doctoral course was created. The department's educational goals are to develop high-quality educators and researchers to carry out original research and efficiently provide education to develop students' competencies. Moreover, the school focuses on the development of personnel who contribute to community health care in rural, island, and international settings.

Graduate School of Agriculture

<http://ace1.agri.kagoshima-u.ac.jp/>

Graduate School of Agriculture was established in 1966. It offers the following three courses: Agricultural Sciences and Natural Resources, Biochemical Science and Technology, and Environmental Sciences and Technology. Located in the food production base of Japan with its immense diversity of biological and natural resources, this school focuses on a number of relevant topics such as environmentally friendly food production techniques, clarification and application of biological functions, conservation and reformation of natural ecosystem, and the revitalization of rural societies. Furthermore, the school promotes research and education for new technology in the field of agriculture, forestry, and food industry by introducing bio-technology and advanced techniques. Overall, the school has been designed to develop students into highly specialized technicians and advanced researchers.

Graduate School of Education

<http://www.edu.kagoshima-u.ac.jp/>

Building on the foundations laid by the Faculty of Education, the Graduate School seeks to cultivate a high level of specialist knowledge, ability, and insight into the complicated problems of present day teaching, through broad academic study and artistic activity.

This program focuses on one central area: Education Practice Research. Graduates of this program will receive a Masters degree. Those who have already attained a first-class teacher's certificate can also acquire a specialized certificate. Those who want to obtain a teacher's license for elementary school can have a license for teaching at junior or senior high school, and must be enrolled in the graduate school about three years.

Graduate School of Science and Engineering

<http://grad.eng.kagoshima-u.ac.jp/>

The Graduate School of Science and Engineering aims to produce professionals who dedicate themselves to scientific pursuits, uphold high ethical standards, and take on difficult challenges. Students are provided with an education that meets the changing needs of contemporary society in both content and application. The curriculum includes theories ranging from basic to applied science and engineering, and students are supported through advanced studies. The Graduate School of Science and Engineering develops students into engineers, researchers, and other professionals that will positively contribute to the future of society. Such professionals will be required to make ethical judgments on sensitive issues, to be knowledgeable about the nature of the world, and to be responsive to the advancement and diversification of the natural sciences.

Graduate School of Fisheries

<http://www.fish.kagoshima-u.ac.jp/>

The Graduate School of Fisheries is composed of five fields: Aquatic Sciences, Fisheries Resource Sciences, Marine Food Sciences, Fisheries Economics, and Aquatic Environment Conservation Sciences. It provides enriched education. Some course lectures are conducted in English because many foreign students are here. A high percentage of foreign students will continue their researches to obtain a Doctoral degree at our United Graduate School of Agricultural Sciences. It has conducted a variety of international activities such as collaboration with some universities in the Southeast Asian countries. It leads enhancement of international credibility of higher education in Japan. In addition to conventional academic activities, it has offered international technical dissemination and transfer and participated in official development assistance projects over the world.

Graduate School of Medical and Dental Sciences

<http://www.kufm.kagoshima-u.ac.jp>

The Graduate School of Medical and Dental Sciences aims to respond quickly to the many demands of society and to carry out high level education and research efficiently, while placing priority on medical ethics. The school strives to apply a flexible and wide-ranging scope to medical research and to the development of treatments for the cure and prevention of human disorders. As central goals, this school hopes to foster leading researchers and educators in life science fields and create a center of education and research in medicine and life science with particular relevance to the local region. In addition to graduates in the fields of medicine or dentistry, the school welcomes graduates from a diverse range of disciplines.

Professional Graduate School of Clinical Psychology

<http://www.leh.kagoshima-u.ac.jp/kumcp/>

The Professional Graduate School of Clinical Psychology was established in April 2007 as an independent graduate course offering a professional degree program that specializes in clinical psychologist training. We provide advanced professional education based on lectures, seminars and practical training to foster clinical psychologists who can contribute to people's mental well-being. On-campus clinical psychology training takes place inside the annexed counseling room. Off-campus training takes place at four locations, covering the medical, educational, welfare, and judicial areas. Graduates of this program possess a very high success rate on employment examinations for clinical psychology. In 2010, we began a community-based program to deliver psychological support.

United Graduate School of Veterinary Science (Headquartered in Yamaguchi University)

<http://ds22.cc.yamaguchi-u.ac.jp/~renju/e.html>

The United Graduate School of Veterinary Science was established in 1990. The school is operated in cooperation with the departments of Veterinary Science at Yamaguchi University, Tottori University, and Kagoshima University. The school offers doctoral degrees in the field of Veterinary Medicine. This four-year program aims to train outstanding researchers and technologists with expert knowledge and advanced practical skills, who will then contribute to the progress of veterinary medicine and its applied sciences as well as the development of related industries. The school promotes international relations and accepts many international students from various countries

Kagoshima University Law School

<http://www.ls.kagoshima-u.ac.jp/>

Established in April 2004, Kagoshima University Law School (KULS) utilizes the advantages and features of a small class composition in order to provide the finest available legal education and teaching methods. The curriculum covers a broad diversity of legal fields, thus providing students with a deep understanding of legal issues and a legal professional's obligation to local and global society. Students are conferred a Juris Doctor (J.D) after they complete the 3 year course and are subsequently qualified for 5 years to take the bar examination. Since 2014, KULS has stopped the recruitment of students in response to changing situations within Japanese society, and is now preparing for a new course of legal education.

United Graduate School of Agricultural Sciences

<http://homeugs.agri.kagoshima-u.ac.jp/>

The United Graduate School of Agricultural Sciences (UGSA) at Kagoshima University was established in 1988. The UGSA is composed of four master programs among three allied universities: Saga University, Kagoshima University, and the University of the Ryukyus. The aim of UGSA is for students to master advanced agricultural or fisheries sciences through study and research involving regional or international issues. Our doctoral research activities focus on food production and environmental conservation based on advanced life science or marine science. Successful graduates of this program are awarded a Doctorate Degree of Philosophy.

University Libraries

<http://www.lib.kagoshima-u.ac.jp/>

The University Libraries consist of the Central Library, the Medical Library, and the Fisheries Library. The aim of the libraries is to provide academic materials and a range of services, including electronic information services, to assist university students, faculty, and staff with their studies, research, and teaching. Electronic information services can be used to locate books and journals in the collections and find information in a variety of databases throughout the campus network.

The Central Library houses the Tamazato Bunko, a valuable collection of manuscripts and xylographic books from the pre-Meiji era that originally belonged to the Regent of Satsuma, SHIMADZU Hisamitsu. It also functions as one of the nine National Deposit Libraries of Foreign Periodicals, housing foreign journals on agriculture.

Education Center

<http://kic.kuas.kagoshima-u.ac.jp/kicwordpress/>

The Kagoshima University Education Center, established in October 2003, aims to promote the development and improvement of the university in a multitude of ways. The center proposes, investigates, and develops new approaches to university education. Additionally, it plans and implements introductory courses (also known as "General Education") that are offered in cooperation with all university faculties. The center also develops measures to enhance foreign language education, and promotes dialogue on overall education within the university as a whole.

The Center's focus also ventures outside the area of General Education. It investigates current university educational practices and suggests improvements. Furthermore, it is responsible for planning and implementing faculty development programs, and the promotion of e-learning and information technology throughout the university.

Global Initiative Center

<http://www.isc.kagoshima-u.ac.jp/>
<https://www.kagoshima-u.ac.jp/kucip/>

The Global Initiative Center, established in April 2016, consists of the Planning and Network Division, the Study Abroad Division, and the International Student Division. It aims to promote the globalization of Kagoshima University in education and research. The Planning and Network Division promotes collaborative efforts in research and education with overseas universities and research institutions and provides information on our university internationally. The Study Abroad Division provides P-SEG, an educational program that provides students with necessary skills and knowledge in global contexts and information on study abroad sessions. The International Student Division is responsible for the "Study Japan Program," offering Japanese language and cultural education, counseling for academic and non-academic affairs, and promoting exchange activities among international students, Japanese students, and the local society.

Medical and Dental Hospital

<http://com4.kufm.kagoshima-u.ac.jp/>

The Medical and Dental Hospital consists of 17 clinical centers, including the Cardiovascular Center, the Digestive Disease Center, the Neurology Center and the Respiratory and Stress Care Center in addition to 38 central clinical facilities. There are also Division of Pharmacy, Division of Nursing, Division of Clinical Technology and the Administration Office.

In 2009, the new central clinical building, including the Surgical Center with 16 operation rooms, Intensive Care Units with 14 isolated rooms, Clinical Laboratory and Medical Material Management Center, was completed. In addition, the new 9-story ward building (C building) was completed in 2013. A clinical training center is installed in the eighth floor, and heliport is installed on the roof.

Inamori Academy

<http://www.inamori.kagoshima-u.ac.jp/>

The Inamori Academy is endowed by generous donations from Kyocera Corporation and its founder and Chairman Emeritus, alumnus Dr. Kazuo Inamori. The Academy was originally established in 2005 as the Inamori Academy of Management & Technology and expanded in 2008 to provide courses containing lectures on Dr. Inamori's works and philosophy to undergraduate students via general education. The central mission of the Inamori Academy is to help university students inherit the spirit of enterprise from the Kagoshima forefathers and develop their potential and skills for leadership in the 21st century, regardless of their chosen field.

Kagoshima Center for Community Development

<http://www.kagoshima-u.ac.jp/coc/>

Kagoshima Center of Community Development was established in October 2014 in order to enhance Kagoshima University's contribution towards clarifying and resolving various regional problems for the local community and government. The local community and government are facing serious problems such as declining population, and the activation of regional industry and agriculture, etc. The Kagoshima Center of Community Development positively contributes towards education, utilizing research from Kagoshima University and cooperation with related local governments. It is necessary for Kagoshima University to make serious efforts to pursue solutions for regional problems and promote activity and sustainability among the local community and government.

Research Center for the Pacific Islands

<http://cpi.kagoshima-u.ac.jp/>

The Research Center for the Pacific Islands promotes interdisciplinary research on island-related issues in the Asia-Pacific region. It has the support of researchers from Kagoshima University and other domestic and overseas universities and institutions. The results of its studies are combined to enhance comprehensive understanding of island environments and further the welfare of island communities. These objectives are pursued primarily through three interrelated projects: natural and social environments of islands and their sustainability; island development problems relating to medical care, information provision and social change; self-sustaining development in islands through technological progress in fields such as agriculture, fisheries and education. The center has a station in the Amami Islands, which supports research and education activities and advances regional goals.

Center for Advanced Biomedical Science and Swine Research

<http://gene4.agri.kagoshima-u.ac.jp/minibuta/>

The Center for Advanced Biomedical Science and Swine Research (CABSS Director: Professor Kazuhiko Yamada) is a major translational research center at Kagoshima University and was formerly part of the Frontier Science Research Center (FSRC). In order to advance priority research projects, especially those with the focus of bringing the "bench to the bedside," the CABSS became independent from the FSRC in April 2012. The CABSS consists of three research divisions: (1) Organ Replacement and Xenotransplant Surgery; (2) Gene Expression and Regulation; and (3) Cancer and Regeneration.

Kagoshima University Museum

<http://www.museum.kagoshima-u.ac.jp/>

The Kagoshima University Museum (KAUM) was established in 2001 as the seventh national university museum in Japan. For the last half-century, Kagoshima University researchers have collected samples and artifacts related to humanities, social sciences, and natural sciences. The aims of KAUM are to preserve these important objects for use in education and research, and to make a new collection from fields. KAUM also introduces the research activities of Kagoshima University through exhibitions, public lectures and publications. The Exhibition Room is open to the public as a permanent display. It consists of four sections: 1) archaeological sites in Kagoshima University, 2) education and research history of Kagoshima University, 3) mineral resources of the earth, and 4) marine fossils from Kagoshima.

Natural Science Center for Research and Education

<http://gene4.agri.kagoshima-u.ac.jp/>

The Natural Science Center for Research and Education was established in April 2012 in accordance with the reorganization of the previous Frontier Science Research Center. The center has four branches related to the fields of isotopes, animal science, biotechniques, and instrumental analysis, and has three laboratories for animal science, gene research, and instrumental analysis. These are all designed to support the high level of natural science research and education at the university. The center aims to promote and support research and education activities in all fields of natural sciences, especially life science, environmental science, and material science.

Research and Education Center for Lifelong Learning

<http://www.life.kagoshima-u.ac.jp/>

The Research and Education Center for Lifelong Learning was established in 2003 to encourage adult education through collaboration with the local community. Based on the intellectual resources accumulated in Kagoshima University, the center provides extension lectures, seminars and symposiums in accordance with the community's needs. In addition, the center provides the community with opportunities for the recurrent education of its leaders in various fields and conducts research projects with the community and local government.

Kagoshima University Innovation Center

<http://www.rdc.kagoshima-u.ac.jp/>

The Kagoshima University Innovation Center promotes cooperation among industries, government, and the university in order to positively contribute to the community. The center is comprised of four divisions. The Liaison Office matches university research activity with social needs, and promotes technology transfer developed with outside organizations and community feedback. The Intellectual Property Office promotes and manages the discovery, protection, maintenance, and utilization of intellectual property generated from the university's educational and research activities. Venture Business Laboratories aid incubation of entrepreneurial business ventures based on academic research and provide business practice lectures. COC+ Promotion Department is intended to develop an educational program that teaches the skills needed for successful work in local business and community.

Computing and Communications Center

<http://www.cc.kagoshima-u.ac.jp/>

The Computing and Communications Center is a core facility of computing and networking at Kagoshima University. It is also a major research and development center for information technology, consisting of three research divisions. The Research Division of Media and Information Technology plays a central role in planning, management and research concerning computing systems for education and the campus computer network. The Research Division of Academic Information Resources researches and develops proper usage of information technology for cooperation both inside and outside the university. The Information Systems Division is in charge of information security in Kagoshima University, and offers strategic planning for campus wide information systems and investigates solutions for the university through the deployment of advanced technology.

Research Center for Archaeology

<https://www.kagoshima-u.ac.jp/maibun/>

There are three archaeological sites on the campuses of Kagoshima University. These sites are located at the Korimoto campus, the Sakuragaoka campus and the Toso residence hall. The Research Center for Archaeology conducts rescue excavation at these sites. Research results are published and accessible to the public.

Research and Education Center for Natural Hazards

<http://bousai.kagoshima-u.ac.jp/>

Established in June 2011, The Research and Education Center for Natural Hazards investigates the mechanisms and causes of natural disasters and examines measures for disaster prevention and damage in Southern Kyushu and the Nanseishoto island chain.

The Research Division conducts research on natural hazards, floods, landslides, volcanic eruptions, earthquakes, tsunamis, radiation, disaster management, emergency evacuations, mental health, medical care, and reconstruction. The Education Division plans and manages lectures and training for general and basic course students, in addition to holding an open seminar and symposium on natural disaster prevention. Additionally, human resources are developed to prevent and mitigate disasters. The Regional Cooperation Division provides proposals and cooperates with local government, communities, and media to prevent and mitigate disasters.

Kagoshima University Center for Judicial Policy Education and Research

<http://www.ls.kagoshima-u.ac.jp/center/>

The Kagoshima University Center for Judicial Policy Education and Research (KUJP) was established in March 2015. The aim of KUJP is to promote social contributions and education/research experiences as law school. As a hub for legal professions in south Kyushu, KUJP is involved in a number of action projects and legal information service as per below:

- 1) Legal consultation for citizens at KUJP
- 2) Professional seminars for career development and updating legal professional skills
- 3) Research and development for legal education
- 4) Provision of infrastructure for legal information service at Kagoshima University
- 5) Legal consultation activity for islands and areas that lack judicial services
- 6) Support for candidates in legal professions

Volunteer Support Center

<http://www.kagoshima-u.ac.jp/volunt/>

The Volunteer Support Center was established in July 2008 with the aim of promoting and supporting the volunteer activities of students at Kagoshima University. The center acts as a liaison between students and the community and provides information to develop the students' 'Ningen-ryoku' (human mind and power) through involvement in various community volunteer activities. The overall goal is to promote student contribution and activity within the community. The center plans and supports the following volunteer projects along with the existing activities: Academic Support, Disaster Relief Activity, Sight-Seeing Support, Support for Under-Populated Areas, Conservation of Rare Creatures, and Campus Cleaning among others.

NUMBER OF INTERNATIONAL STUDENTS

According to Field of Study

FACILITIES

Health Service Center <http://hsc.kuas.kagoshima-u.ac.jp/>

The Kagoshima University Health Service Center is staffed with medical doctors, nurses, counselors, and social workers for the physical, mental, and educational well-being of Kagoshima University community.

It offers regular general check-ups (from mid-April, for three weeks), special examinations, health counseling, advice on health maintenance, and first aid treatment. Medical services of the Health Service Center are usually free of charge and those visiting the center do not need to show a health insurance card.

Kagoshima University International Residence Hall

Kagoshima University International Residence Hall provides accommodations for overseas students and academics engaged in study or research at Kagoshima University. It is also intended as a setting for international cultural exchange.

With a fine view to the east of the volcano Sakurajima, the hall is situated in a quiet residential district adjacent to Faculty of Fisheries. Public transport is within easy reach, with the nearest streetcar stop five minutes away on foot and the nearest bus stop just a minute away. It is a 15-minute walk to the Korimoto campus.

Kagoshima University International Lodge

Kagoshima University International Lodge was constructed in December 2003 in Shimo-arata district adjacent to the Faculty of Fisheries on the other side of the International Residence Hall as a donation of Kagoshima University's 50th Anniversary for overseas scholars and guests visiting Kagoshima University. The building is two stories on a steel framework and consists of two types of 16 single rooms for long and short term stay. Its total floor area is 502m² and each room is equipped with a TV, refrigerator, and other necessary furniture.

Inamori Auditorium

The Inamori Auditorium was constructed in 1994 with a special donation by alumnus Dr. Kazuo Inamori and was designed by renowned architect Tadao Ando, later recipient of the 2002 Kyoto Prize in Arts and Philosophy. Its large lecture hall, named for Dr. Inamori's parents Kimi and Kesa, is widely used for university courses and events.

Information Center

The Information Center was opened at the University's main gate in April 2007 as the communication center for prospective students, company staff, and the general public. At the center, information about various events and other items are provided and some research products are also exhibited. A staff member is assigned to introduce the available facilities to visitors, distribute a variety of university brochures and journals, show examples of the entrance examination, and sell farm products direct from farms, Kagoshima University Brand Sho-chu, and other original goods. In addition, a DVD of the university guide is always available for viewing.

Open: Monday to Friday (except national holidays) 9:30 to 16:30

Core Educational Facility for Shared Use: T/V Kagoshima-maru, Training Vessel of Faculty of Fisheries

The new training vessel, Kagoshima-maru (IV) was completed on March 30, 2012 and put into commission in the 2012 academic year. T/V Kagoshima-maru is one of the latest academic vessels, which has unique high-maneuvrability, e.g. diagonal transfer and pin-point turn around with no forward motion. It enables experiments and oceanographic surveys which used to be difficult on rough seas, and enriches new education and research, due to the installation of the latest observation devices onboard. This vessel is the successor of the last T/V Kagoshima-maru (III) which had been authorized as the first 'Core Educational Facility for Sharing Use (CEFSU)' by the Minister of Education, Culture, Sports Science and Technology, and is designated as 'CEFSU for on-board education on tropical and sub-tropical waters.' This authorisation reflects the excellently accumulated achievements by T/V Kagoshima-maru and Kagoshima University, which have been active around the concerned region for many years. Because of the designation, T/V Kagoshima-maru is now responsible to educate students of not only Kagoshima University but also other universities. Students of other universities have become able to receive high quality on-board training and attain credits. T/V Kagoshima-maru is expected to play a role as the center of education in the seas, including Southeast Asian and Pacific waters.

Core Educational Facility for Shared Use: Takakuma Experimental Forest

In 1909, the Takakuma University Forest (Tarumizu City) was established in the Kagoshima College of Agriculture and Forestry, a predecessor of Kagoshima University, as a place for forestry education and research. The total area is 3,061ha (accounting for 19% of Tarumizu City and 84% of the property of Kagoshima University). The planted trees originate from the 100 year old endeavors of our predecessors. At present the planted trees (consisting of Japanese cedar and Japanese cypress originally from Yakusugi) occupy approximately one-third of southern Kyushu, while the rest is covered in natural forests of lush evergreen trees.

The forest is used mainly for students taking courses in forest science and courses for practical training and research. Since around 2000, the forest has also been used for courses in general education (other than the practical training courses) and in other university subjects. Other regional contributions have included forest education programs for younger students, and forest technician training for adults, which have greatly expanded the forest's uses.

Based on these previous accomplishments, the Ministry of Education has recognized the Takakuma Experimental Forest as a Joint Usage Educational Center since 2014, in order to further develop effective practical uses of the forest. Its uses as a center will include learning from Kagoshima's 100 year old forests, and environment/disaster prevention education.

The previous year had a total of 247 people from 14 universities using the forest. In 2015 there are plans to further forest applications in diverse fields such as forestry education, environmental education, disaster prevention education, plant and animal education.

CAMPUS GUIDE

The campuses of Kagoshima University are located in Kagoshima City, which has a population of more than half a million and is the most populous urban area in the southernmost part of Japan.
