

Attachment 1. Activity Poster

ECHO 2026
Enviro Course for Harmony and Global Sustainability Outreach
"From Waste to Energy: Sustainable Wastewater and Biogester Solutions: Case Studies and Innovations from Indonesia."

Benefits

- Certificate of participation
- Global academic networking
- In-depth knowledge and applicable skills in wastewater management

Learning modules

- Water, Sanitation, and Hygiene
- Implementation of Biogester for Domestic Wastewater
- Biogas Production from Different Waste Material
- Wastewater Treatment for Treating Domestic Wastewater
- Implementation of Biogester for Tofu Wastewater in Indonesia

What's in the course?

- **Workshop and Lectures covering topics:**
 - Water, Sanitation, and Hygiene (WASH)
 - Domestic Wastewater Challenges
 - Wastewater Treatment Technologies
 - Biogester Applications
 - Biogas Production & Resource Recovery
- **Field visit:**
 - Wastewater Treatment Plant
 - Village community to explore wastewater treatment technologies, biogas recovery, and environmental management practices.
- **Project presentation**

Timeline:

- Registration Period: 22 June - 6 July
- 7 July: Selection Period
- Announcement: 8 July
- 20 - 29 July: Program Dates

Eligibility criteria

- Non-Indonesian citizens
- Open to undergraduate and postgraduate students from universities worldwide

Offline activities limited to **only 20 participants**

FREE
*exclude flights and visa fees
